Gary Boyd

To Rice Games,

I am very interested in working with your team. I've been playing JRPG's and making games as a passionate hobby since the days of Super NES and Playstation. I love many of the series you mentioned on the LinkedIn post and have recently even been replaying NeiR: Automata. I love the style of the games you have presented on your website and hope that we can work together soon!

I don't have much industry experience but I make up for it with enthusiasm and dedication. I'm a self taught programmer who has always loved making games as a way to push my skills. Making games can be just as fun as playing them, like a hidden little puzzle genre that most gamers don't ever experience.

Here's a link to my website with more back story about me, and more details on portfolio projects than what is available through my Resume.

GaryBoyd.tech

Hope to hear from you soon,

Gary Boyd

Résumé

I am a passionate game programmer looking to get started in this industry. I'm self taught and that means i'm self motivated. I have been on this path for some 20 years now and am certain I will be able to pick up and perform whatever tasks are needed while working on kick ass projects!

On a team I believe in open mindedness, open communication, and treating every day like a learning experience. The team should be in a constant state of bettering each other and building solid skills that will benefit future work together.

Technical Skills

C#, C++, Java
Unity, Godot, GMS2
PHP, MySQL, Javascript
Python, Ruby, Lua

2017 - 2018

Back End Developer Amlia.com

Worked with a small team and data consultants to build a scalable data pipeline that kept the clients database up to date with the latest information on dietary supplements. Also did the back end work for all payment systems (Paypal, Stripe, Google, Apple).

2017

Student, Teaching Assistant Mined Minds

Completed course work of Mined Minds boot camp in half the time while helping teach the other students in the class who had less experience than me. This was an invaluable experience to me as someone who had only really worked alone before this.
